

AROAX - BLOOMING AGENT

DESCRIPTION:

AROAX BLOOMING AGENT is composition an aqueous amino polymer emulsion for a smooth Surface handle and Blooming effect on dark shades

PROPERTIES:

- ❖ **PRODUCT** : Organo modified poly siloxane.
- ❖ **APPEARANCE** : Milky dull white
- ❖ **PH** : 4.0 -6.0
- ❖ **NATURE** : Non-ionic.
- ❖ **COMPATIBILITY** : Compatible with cationic & non- ionic textile finishing agent

FEATURES:

- ❖ Smooth Surface hand feel.
- ❖ Enhances the shade of the finished fabrics significantly.
- ❖ Consistent surface finish on woven.
- ❖ Best recommended for Exhaust and Padding applications.
- ❖ Best suitable for black, dark blue shade Cotton substrates.
- ❖ Self life 6 months.

APPLICATION:

FOR GARMENT FINISHING

(On Cotton & Blends)

Dosage: 2-4 % owm

PH: 5-5.5

Time: 20-25 mins

Temperature: <40°C

Drying Temperature: 120-140°C

FOR Padding

(Dry on wet Padding, On Cotton & Blends)

Dosage: 20-30 gpl

PH: 5-5.5

Time: 1 Dip/ 1 Nip

Temperature: <40°C

Drying Temperature: 120-140°C

PROCESS:

- ❖ Mix product well before use for better application.
- ❖ Check compatibility with other bath additives before use.
- ❖ Check the water quality. If water hardness / TDS is more than 250 ppm.
- ❖ Check for any pH and temperature drift during the softening cycle
- ❖ Do not expose product to prolonged periods at temperature above 50° C
- ❖ Dilutions should be stored in close containers not more than a month.
